### DETAILED ACTION

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claim 5 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 5 repeats a limitation already recited.

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claims 1-9 are rejected under 35 U.S.C. 102(b) as being anticipated by Beringer.

Beringer provides a hull having a vertical plane of two-fold symmetry, comprising: first and second outer elongated hulls **14,14'**; wherein said first and second outer hulls each curve inwards with respect to the vertical plane of two-fold symmetry thereby respectively defining first and second keel fins, wherein said first and second keel fins are angled inwards towards the vertical plane of two-fold symmetry. An elongated central hull **12** is provided as well.

Re claim 8, since the hulls are symmetrical as claimed, the buoyancies of the outer hulls will be the same.

Re "hybrid", such is intended use, carrying no weight in the claim.

Art Unit: 3617

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Orr, Japan '680, Vaton and Gruszecki show hulls exhibiting an inwardly directed keel fin.
